## PROFESSIONAL SUMMARY

---

Senior Magento (2.x) Developer with 7+ years of hands-on experience building, customizing, and optimizing Magento-based e-commerce platforms. Proven track record delivering scalable B2B and B2C solutions for global clients across Pakistan, South Africa, Iraq, and Sweden. Skilled in custom module development, headless commerce architecture, API integrations, and multi-store management. Comfortable working across international teams in Agile/Scrum environments with a strong focus on performance, security, and maintainability.

## TECHNICAL SKILLS

---

**Programming Languages:** PHP, JavaScript (ES6+), HTML5, CSS3, SCSS, Python  
**Frameworks & Platforms:** Magento (2.x), Drupal 8, WordPress, jQuery, Bootstrap, Tailwind CSS  
**Databases:** MySQL, Redis, MongoDB — including schema design and query optimization  
**Cloud & DevOps:** Docker, Linux (RHEL, Ubuntu), Git, CI/CD pipelines, Jenkins  
**Server & Infrastructure:** Apache, Nginx, RESTful APIs, Headless/Composable Architecture  
**Integrations:** Payment Gateways, ERP Systems, Third-Party APIs (Ericsson, Telecom)  
**Architecture:** Headless Commerce, B2B/B2C Platforms, Microservices  
**Tools:** PHPStorm, VS Code, Composer, Postman, Elasticsearch, Jira, Redmine  
**Version Control:** Git, GitHub, GitLab

## PROFESSIONAL EXPERIENCE

---

### Senior Magento Developer | [Evamp & Saanga](#)

Jan 2019 – Present

- Designed and developed custom Magento (2.x) themes with fully responsive layouts, ensuring pixel-perfect alignment with client design standards and modern UI/UX best practices.
- Built custom Magento (2.x) extensions and RESTful APIs to extend platform functionality, including product catalog enhancements, checkout customizations, and third-party service integrations.
- Improved Magento store performance by implementing caching strategies (Redis, Varnish), optimizing database queries, and fine-tuning server configurations — reducing page load times significantly.
- Applied Magento security patches, updates, and hardening measures to maintain compliance with Magento best practices and protect against known vulnerabilities.
- Configured and managed complex multi-store setups, including product catalogs, pricing rules, customer groups, and payment gateway integrations.
- Led code reviews and maintained clean Git branching strategies across feature, staging, and production environments.
- Collaborated closely with frontend engineers and UI/UX designers to ensure seamless integration of design mockups into functional Magento storefronts.
- Managed end-to-end data migration projects, transferring product, customer, and order data from legacy e-commerce platforms to Magento (2.x) with zero data loss.
- Participated in project discovery, sprint planning, and technical estimation sessions, providing input on feasibility, timelines, and architecture decisions.

### Web Application Trainee | [Arete Apps](#)

Nov 2017 – Apr 2018

- Gained foundational skills in PHP and WordPress development through structured training and hands-on project work.

- Customized WordPress themes and built functional web pages for client websites, applying responsive design principles.

## IT Support Intern | [Attorney General's Office \(AGFP\)](#)

Apr 2016 – Apr 2017

- Provided technical support for software installation, configuration, and day-to-day maintenance across office systems.
- Maintained and updated the online library and staff attendance management system to ensure accurate recordkeeping.
- Updated official website content to reflect current legal communications and organizational announcements.

## KEY PROJECTS

---

### Jazz Business E-Care Portal — Jazz Pakistan

- Built a comprehensive self-service web portal on Magento (2.x) for Jazz Pakistan's business customers, enabling telecom account management, billing, and service requests at scale.

### Jazz World (Simosa) — Jazz Pakistan

- Developed a headless e-commerce platform using Magento (2.x) as a content and commerce API backend, integrated with custom payment gateways and CMS for a seamless, high-performance user experience.

### MTN Marketplace — MTN South Africa

- Built a B2B/B2C Magento (2.x) marketplace enabling vendor onboarding and product sales, integrated with Ericsson Wallet Platform (EWP) for payments and Ericsson APIs for end-to-end logistics management.

### Ericsson Connected Recycling (ECR) — Global

- Developed a headless Magento (2.x) B2B platform supporting a circular economy model, enabling companies to buy and sell recycled materials (PET, aluminium, e-waste). Built full traceability workflows connecting waste management companies, recyclers, and manufacturers across global markets.

### Korek Mobile Application — Korek Telecom, Iraq

- Delivered a headless Magento (2.x)-powered mobile commerce platform with custom payment gateway integrations and a CMS layer, enabling a fast and flexible digital retail experience for telecom customers.

### Board of Investment (BOI) Portal — Pakistan

- Configured and developed content views, custom blocks, and structured field layouts in Drupal 8 to build a dynamic, government-grade web portal for the Board of Investment.

### Metropolitan Academy of Arts and Design

- Installed and customized WordPress theme, refined layout and visual consistency, and updated website content to reflect the institution's branding and course offerings.

### Auto Insurance Worx

- Performed WordPress theme customization, configuration updates, and content improvements to enhance site usability and presentation for an insurance services client.

## EDUCATION

---

### Master of Information Technology

2013 – 2016

Quaid-I-Azam University, Islamabad

### BSc

2010 – 2012

University of Gujrat, Gujrat
