MUHAMMAD AQIB SALEEM

Senior Magento 2 & Adobe Commerce Developer | E-Commerce & Headless Commerce Specialist
Rawalpindi, Pakistan | +92 331 928 3006 | maqib.saleem137@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Senior Magento 2 Developer with 7+ years of hands-on experience designing, building, customizing, and optimizing enterprise e-commerce platforms. Proven record of delivering scalable B2B and B2C solutions for global clients across Pakistan, South Africa, Iraq, and Sweden. Specialized in custom module development, headless and composable commerce architecture, API integrations, and multi-store management. Experienced working within international, cross-functional Agile/Scrum teams, with a strong focus on performance, security, scalability, and maintainability.

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript (ES6+), HTML5, CSS3, SCSS, Python

Frameworks & Platforms: Magento 2, Drupal 8, WordPress, jQuery, Bootstrap, Tailwind CSS

Databases: MySQL, Redis, MongoDB (schema design, query optimization)

Cloud & DevOps: Docker, Linux (RHEL, Ubuntu), Git, CI/CD Pipelines, Jenkins

Servers & Infrastructure: Apache, Nginx, RESTful APIs, Headless/Composable Architecture

Integrations: Payment Gateways, ERP Systems, Third-Party APIs (Ericsson, Telecom)

Architecture: Headless Commerce, B2B/B2C Platforms, Microservices

Tools: PhpStorm, VS Code, Composer, Postman, Elasticsearch, Jira, Redmine

Version Control: Git, GitHub, GitLab

PROFESSIONAL EXPERIENCE

Senior Magento Developer, Evamp & Saanga Jan 2019 – Present

- Designed and developed custom Magento 2 themes with fully responsive layouts, delivering pixel-perfect alignment with client design standards and modern UI/UX best practices.
- Built custom Magento 2 extensions and RESTful APIs to extend platform functionality, including product catalog enhancements, checkout customizations, and third-party service integrations.
- Improved store performance by implementing caching strategies (Redis, Varnish), optimizing database queries, and fine-tuning server configurations, significantly reducing page load times.
- Applied Magento security patches, updates, and hardening measures to maintain compliance with best practices and protect against known vulnerabilities.
- Configured and managed complex multi-store setups, including product catalogs, pricing rules, customer groups, and payment gateway integrations.
- Led code reviews and maintained clean Git branching strategies across feature, staging, and production environments.
- Collaborated with frontend engineers and UI/UX designers to translate design mockups into functional, high-performing Magento storefronts.
- Managed end-to-end data migration projects, transferring product, customer, and order data from legacy e-commerce platforms to Magento 2 with zero data loss.
- Contributed to project discovery, sprint planning, and technical estimation, advising on feasibility, timelines, and architecture decisions.

Web Application Trainee, Arete Apps Nov 2017 – Apr 2018

- Built foundational skills in PHP and WordPress development through structured training and hands-on project work.
- Customized WordPress themes and developed functional web pages for client websites, applying responsive design principles.

IT Support Intern, Attorney General's Office (AGFP) Apr 2016 – Apr 2017

- Provided technical support for software installation, configuration, and day-to-day maintenance across office systems.
- Maintained and updated the online library and staff attendance management system to ensure accurate recordkeeping.
- Updated official website content to reflect current legal communications and organizational announcements.

KEY PROJECTS

Jazz Business E-Care Portal — Jazz Pakistan
Built a comprehensive self-service web portal on Magento 2 for Jazz Pakistan's business customers, enabling telecom account management, billing, and service requests at scale.

Jazz World (Simosa) — Jazz Pakistan
Developed a headless e-commerce platform using Magento 2 as a content and commerce API backend, integrated with custom payment gateways and a CMS for a seamless, high-performance user experience.

Nar / Bakcell E-Shop — Azerbaijan
Built a headless Magento 2 / Adobe Commerce e-commerce platform for telecom operators Bakcell and Nar, using Magento as the backend commerce engine and providing APIs to a separate frontend application built by the frontend team.

Ericsson Connected Recycling (ECR) — Global
Developed a headless Magento 2 B2B platform supporting a circular-economy model, enabling companies to buy and sell recycled materials (PET, aluminium, e-waste). Built full traceability workflows connecting waste-management companies, recyclers, and manufacturers across global markets.

Korek Mobile Application — Korek Telecom, Iraq
Delivered a headless Magento 2-powered mobile commerce platform with custom payment gateway integrations and a CMS layer, enabling a fast and flexible digital retail experience for telecom customers.

Board of Investment (BOI) Portal — Pakistan
Configured and developed content views, custom blocks, and structured field layouts in Drupal 8 to build a dynamic, government-grade web portal for the Board of Investment.

Metropolitan Academy of Arts and Design
Installed and customized a WordPress theme, refined layout and visual consistency, and updated content to reflect the institution's branding and course offerings.

Auto Insurance Worx
Performed WordPress theme customization, configuration updates, and content improvements to enhance site usability and presentation for an insurance-services client.
